DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 7-9, drawn to a method for providing a diagnosis as to whether hypotension in a patient is due to vasodilation or is associated with compensatory vasoconstriction, comprising the steps of performing an harmonic analysis on said measured waveforms and comparing the moduli of the harmonic components and diagnosing the cause of hypotension as being vasodilation if the modulus of the first harmonic is less than the modulus of the second harmonic.

Group II, claim(s) 10-12, drawn to a method for providing a diagnosis as to whether hypotension in a patient is due to vasodilation or is associated with compensatory vasoconstriction, comprising the steps of comparing the amplitude of the primary waveform to the amplitude of the secondary waveform and diagnosing the cause of hypotension as being vasodilation if the amplitude of the secondary waveform is less than 25% of the amplitude of the primary waveform.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the analysis of the arterial waveforms and diagnose of hypotension for both groups are distinct and require separate consideration and search for patentability.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
